

Capabilities Statement

Video Production Services

Inflight Productions has been working with the best businesses in the region since 1978. With high definition video, digital graphics and animation, digital audio production and high definition post production, we can successfully execute the most challenging projects.

Take a look at our work: www.inflyte.com/demo

All production services are supported with professional broadcast level HD cameras, support, and **grip/lighting** and **UAV aerial** packages. Postproduction services are accomplished with two Avid HD digital non-linear edit suites and our **graphics/animation station**.

Equipment and support details can be found here: www.inflyte.com/assets

Inflight delivers effective design solutions in the medium of motion. To execute those solutions, we've built a system that efficiently carries projects from concept to delivery. Company owned (not contracted) assets including camera/grip/light packages and a **10,000 square foot studio** with **in-house postproduction** give us exceptional finished product capacity and turnaround times.
